Skills

- **AI & Security Automation:** LLM integration (Llama 3, Ollama), AI-driven alert triage, automated enrichment, Python security tooling, SOC automation
- **Detection & SOC:** Alert triage, incident investigation, threat detection, log analysis, SIEM operations, IOC identification, MITRE ATT&CK mapping, detection rule development, false positive reduction
- **Cloud Security:** AWS, Azure, cloud log monitoring, cloud misconfiguration assessment
- **Programming & Scripting:** Python, Bash, JavaScript
- **Security Tools:** Splunk, Burp Suite, Semgrep, AWS Inspector, Nmap, Docker
- **Networking & Systems:** TCP/IP, DNS, HTTP/S, firewalls, IDS/IPS, authentication and authorization
- **Security Frameworks:** MITRE ATT&CK, NIST CSF, OWASP Top 10

Experience

Toyota Insurance Management Solutions — Cybersecurity Intern (June 2026 – August 2026)

- Triaged vulnerability findings from AWS Inspector, assessed severity, and coordinated remediation directly with developers, documenting risks and recommendations
- Integrated Semgrep SAST into Bitbucket pipeline as part of Phase 1 of a Secure SDLC program, enabling automated static analysis on every code push across development teams
- Evaluated and benchmarked SAST/SCA tooling against DVWA to assess detection coverage and false positive rates, validating and tracking security findings
- Improved Microsoft Defender Secure Score by 12% by identifying and remediating security misconfigurations across the environment using Defender and Intune

Investment Planning Counsel - Web Coordinator (August 2022 – Feb 2024)

- Built and maintained over 100 new client advisor websites using CSS, HTML, and JavaScript.

Cognizant Technology Solutions - Senior Process Executive (November 2017 – July 2020)

- Flagged integrity issues and contributed to ad policy enforcement

Projects

- **AI-Powered SOC Alert Triage System**
 - Built a Python pipeline that enriches source IPs against AbuseIPDB in real time and deploys Llama 3 via Ollama to auto-generate investigation summaries and MITRE ATT&CK mappings, demonstrating security evaluation of AI-enabled workflows.
- **CloudTrail Threat Detection**
 - Developed a Python script to detect high-risk AWS CloudTrail activity, including unauthorized IAM access and StopLogging events, and map findings to MITRE ATT&CK techniques.
- **AI-Assisted Web Application Penetration Test**
 - Conducted a web application penetration test against OWASP Juice Shop using Burp Suite, exploiting SQL injection and JWT vulnerabilities, and built a Python tool that feeds captured HTTP traffic into a local LLM to auto-generate structured vulnerability reports with remediation steps.
- **Serverless AWS Security-Aware Application**
 - Built a full-stack serverless application on AWS using Lambda, API Gateway, DynamoDB, and S3 with IAM least-privilege controls, CloudWatch monitoring, and role-based access — used as a Semgrep scan target to validate SAST detection in a realistic codebase

Certifications

- CodePath Intermediate Cybersecurity — Spring 2026

Education

- MS in Computer Science – Cybersecurity, January 2025 – Present, GPA: 3.96
Sofia University
- PG Certificate In Software Quality Assurance and Test Engineering, April 2022 & PG Certificate In Computer Applications Development, April 2021
Conestoga College Institute of Technology And Advanced Learning
- Bachelor's In Electronics & Communications Engineering, May 2017
Indraprastha University
