Skills

- **Application Security:** Secure SDLC, vulnerability assessment, SAST/SCA, Semgrep, web application security, OWASP Top 10
- **Security Operations:** Alert triage, threat detection, incident investigation, log analysis, MITRE ATT&CK
- **Cloud & Identity Security:** AWS IAM, AWS Inspector, CloudTrail, CloudWatch, Amazon Bedrock, Microsoft Entra ID, least-privilege access, role-based access control
- **AI Security & Automation:** LLM security testing, Amazon Bedrock Guardrails, AI-assisted security analysis
- **Security Monitoring & Tools:** Splunk, Elastic Stack (ELK), Microsoft Defender, Intune, Burp Suite, Wireshark
- **Programming & Infrastructure:** Python, Bash, JavaScript, Linux, Docker, Docker Compose, Bitbucket Pipelines
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, firewalls, IDS/IPS

Experience

Toyota Insurance Management Solutions — Cybersecurity Intern (June 2026 – August 2026)

- Configured and tested a pilot Semgrep SAST integration in Bitbucket Pipelines as part of Phase 1 of a Secure SDLC initiative; validated scan findings and trained developers on using the tool.
- Evaluated SAST/SCA tools against DVWA to assess vulnerability detection coverage, identify false positives, and document findings.
- Triage AWS Inspector vulnerability findings, assessed severity, and coordinated remediation with developers while documenting risks and recommendations.
- Improved Microsoft Defender Secure Score by 12% by identifying and remediating security misconfigurations using Microsoft Defender and Intune.

Investment Planning Counsel – Web Coordinator (August 2022 – Feb 2024)

- Built and maintained over 100 new client advisor websites using CSS, HTML, and JavaScript.

Cognizant Technology Solutions – Senior Process Executive (November 2017 – July 2020)

- Flagged integrity issues and contributed to ad policy enforcement

Projects

AI-Assisted Web Application Security Testing | Burp Suite, OWASP Juice Shop, Python

- Conducted security testing in the OWASP Juice Shop training environment, examining SQL injection and JWT-related vulnerabilities using Burp Suite.
- Developed a Python-based assistant that processes captured HTTP traffic and uses a local LLM to generate structured security findings and remediation recommendations.

AI Security Lab on AWS | Amazon Bedrock, Guardrails, CloudWatch

- Developed an AI-powered customer support assistant using Amazon Bedrock and evaluated two models for sensitive information disclosure using simulated credentials.
- Tested model responses to a false administrator claim and observed differences in their handling of sensitive information requests.
- Configured Amazon Bedrock Guardrails, including denied topics and prompt attack filtering, to strengthen application safeguards.
- Implemented CloudWatch invocation logging, metric filtering, alarms, and SNS notifications to monitor credential extraction attempts.

AI-Powered SOC Alert Triage System | Python, AbuseIPDB, Llama 3, Ollama

- Built a Python-based security alert triage pipeline that processes simulated SIEM alerts, enriches IP addresses using AbuseIPDB threat intelligence, and applies rule-based severity classification.
- Integrated Llama 3 through Ollama to generate investigation summaries and MITRE ATT&CK mappings, supporting security analysis and alert prioritization.

SSH Log Monitoring Pipeline | Docker, Elastic Stack, Linux

- Deployed Elasticsearch, Logstash, and Kibana using Docker Compose to establish a centralized security logging

environment.

- Developed a Logstash pipeline to ingest Linux SSH authentication logs, enabling searches, visualization, and investigation of authentication activity.

AWS CloudTrail Threat Detection | Python, AWS IAM, CloudTrail

- Developed a Python script to analyze AWS CloudTrail events and identify potentially suspicious IAM activity, including sensitive permission changes and logging disruptions.
- Generated findings to support cloud security monitoring, investigation, and incident analysis.

Certifications

- CodePath Intermediate Cybersecurity — Spring 2026

Education

- MS in Computer Science – Cybersecurity, January 2025 - Present GPA: 3.96
Sofia University
- PG Certificate In Software Quality Assurance and Test Engineering, April 2022 & PG Certificate In Computer Applications Development, April 2021
Conestoga College Institute of Technology And Advanced Learning
- Bachelor's In Electronics & Communications Engineering, May 2017
Indraprastha University
